STEAM STREAMING BUILD BREAKDOWN

Building a PC is a significant milestone in a young gamer's life. By purchasing the STEAM Streaming Program, you'll not only inspire your child to fully embrace STEAM philosophies but also open the door to a world of new knowledge and social experiences. Below is an overview of the PC build and how it can do more in your building.

STEAM Streaming Sample Build

- Nvidia Graphics Card
- 32GB DDR5 RAM
- CPU Liquid Cooler
- Intel CPU
- 1 TB Solid State Drive
- 2- 144 Hz Monitors
- Green Screen
- Modular Power Supply
- Streaming Lights
- Streaming
- Microphone
- Mechanical Keyboard
- Gaming Mouse
- Gaming Headset

Possible Uses for Your Build

In addition to having your students build the PC, learn the necessary programs to establish an online presence, and host a charity stream for a local organization or cause, your new PC and streaming equipment will also enable your building to:

- Audio Production
- Video Production
- Photoshop and Photo Editing
- Esports Shoutcasting
- Morning Announcements
- Photography Booth
- Social Media and School Promotions
- Podcast and Radio Production
